

Appeal to social organisations, scientists, researchers and experts in favour of the “European Manifesto” in Support the European Citizens’ Initiative (ECI), for an EMF exposure regulation, which truly protects public health.

The citizen concern on electromagnetic fields, expressed in the [Special Eurobarometer 347](#), and the [scientific early warnings](#) have led to the [European Manifesto in support an ECI \(for an EMF exposure regulation, which truly protects public health\)](#) in June 2013 by the coordination of citizens' associations of different European countries.

This Manifesto is a basis for creating networks social networks of grassroots groups, in each country and at the European level, in favour of precautionary regulation of the Electromagnetic Fields (EMF) exposure, disseminating scientific and independent professional's alerts to apply the Precautionary Principle and the ALARA and ALATA principles (as low as reasonably and technologically achievable) to electromagnetic pollution, in line with the recommendations of [Resolution 1815 \(2011\)](#) of the [Parliamentary Assembly of the Council of Europe](#) on "The potential dangers of electromagnetic fields and their effect on the environment".

As European Coordination of organizations for an EMF exposure regulation, which truly protects public health, we invite you to sign this European Manifesto that will form the basis of our claims in a ECI future, as researchers, scientists and experts, or as representatives of social organizations.

Regardless of whether an ECI is launched or not, we request your support for this European Manifesto as a direct support for the recommendations and precautionary claims advocated from different domains (scientific-professional, public institutions and civil society) in each country.

The Manifesto basis are the following:

- The protective recommendations of European institutions, as the [Resolution 1815 \(2011\)](#) of the [Parliamentary Assembly of the Council of Europe](#), the resolutions of the [European Parliament](#) in 2008 ([P6_TA\(2008\)0410](#)) and in 2009 ([P6_TA\(2009\)0216](#)), the recommendations of the [European Environment Agency \(EEA\)](#) from [2007](#) to present ([2009, 2011, 2013](#)), and the [opinion on Electromagnetic hypersensitivity](#) approved (7 January 2015) by the [TEN Section of the European Economic and Social Committee \(EESC\)](#).
- The scientific reviews as the [BioInitiative Report 2007](#) and subsequent status updates in [2012](#) and [2014](#) (more than 4,000 studies) and the [Monograph of the International Commission for Electromagnetic Safety \(ICEMS\)](#) on "Non-Thermal Effects and Mechanisms of Interaction Between Electromagnetic Fields and Living Matter" ([2010](#)), the [appeals and scientific resolutions](#) as the [International Scientists Appeal \(2015\)](#) to U.N. to Protect Humans and Wildlife from Electromagnetic Fields and Wireless Technology (over 220 Scientists from 41 nations engaged in the study of biological and health effects of non-ionizing electromagnetic fields), and the [numerous professional and scientific associations](#).
- The WHO/International Agency for Research on Cancer (IARC) has classified the electromagnetic fields as **Group 2B possibly carcinogenic to humans**, [in extremely low frequency (ELF) fields in [2001](#) and in radiofrequency (RF) fields in [2011](#)]. The [working group BioInitiative](#) presented the results of new studies that endorse the classification as **Group 1 carcinogens to humans**, both the ELF ([2012](#)) as the RF ([2014](#) and [2016](#)).
- The compliance with International conventions, as the [Convention on the Rights of Persons with Disabilities \(2006\)](#) and the [Aarhus Convention \(1998\)](#), on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters.
- The [advices and more protective regulations](#) on EMF exposure by governments and health authorities, which is already in implementation in different countries.

THE MAIN PROPOSALS OF THE EUROPEAN MANIFESTO IN SUPPORT OF AN ECI FOR AN EMF EXPOSURE REGULATION, WHICH TRULY PROTECTS PUBLIC HEALTH:

- Application of the **precautionary principle** and the **ALARA** and **ALATA** principles (as low as reasonably and technologically achievable) for the electromagnetic fields (EMF) exposure.
- **Minimization of EMF exposure limits**, on the basis of **bio-effects**, and **Real-time comprehensive monitoring**, starting with 0.6 V/m (outdoor) at Radiofrequency and 1 mG at extremely low frequencies.
- Information and labeling campaigns to minimize the EMF exposure.
- Schools as **Healthy Zones EMF-FREE**.
- **Recognition of electromagnetic hypersensitivity (EHS) and protection of the electrohypersensitive people** in health areas, workplaces, public and private (home).
- **Promotion of studies and independent research**. Ensure transparency, impartiality and plurality of expert assessments.
- **Promotion and establishment of networks, technologies and techniques that are biocompatible and sustainable**.
- **Health standards and social code** for protection from passive exposure.

These proposals will be the basis of a legally viable European Citizens' Initiative. This initiative aims to open the debate in the Council of Europe, the European Parliament and Member States of the European Union to create legislative changes that ensure the implementation of the **Precautionary Principle** and **health protection** in the deployment of wireless technology and electricity networks.

We, the undersigned, as scientists/researchers/experts or as representatives of our respective organizations, subscribe to "European Manifesto in support an ECI for an EMF exposure regulation, which truly protects public health":
